INTERN JAVA

I always wanted to learn more about the job I chose, a real software project. I want to gain more experience and improve soft skills such as teamwork and communication in English. Even though I have no experience, I promise to work as hard and enthusiastically as possible to complete it job.

SKILLS

Front-end: HTML/CSS, JAVASCRIPT

Back-end: NodeJS

Programming language: C++, Javascript

Database management system: SQL server, MongoDB

PARTICIPATING PROJECTS

Recruitment website

Sep 2023 - Present

Role: BE Developer

This project is about constructing an online recruitment website. This system facilitates the connection between employers and job seekers based on matching criteria between the two parties.

Technology: Reactjs, Nodejs, mongoDB

Process: Scrum

Link: <https://github.com/dataiti/CMUSE450-Capstone1-Smart-Recruitment-System>

Ecommerce

Feb 2023 - May 2023

Role: BE developer

This project involves building the back-end for an online shopping website. It is an application of what I have learned about Node.js in a practical context.

Technology: Html/css/Js, Nodejs, mongoDB

Link: https://github.com/khoadoan11/khoa_ecommerce_nodejs

Sovereign fashion shop

Aug 2022 - Dec 2022

Role: FE developer

This project involves building a fashion store catering to the youth. It is my first team project where I apply what I've learned about front-end development into practical use.

Technology: Html/Css/Js, .Net, SQL server

Process: Scrum
